DOSAFAR- We believe that Latest technology strengthens all successful modern bus operators. Traditional approach of people resources and quality does not work any longer. DOSAFAR is here to Digitally Transform your business. Bus Operators now increasingly expect technology to be the tool of change and expect us to devise strategies that are driven by ideas.

A fully customizable Bus Ticketing Solution that provides counter booking, online ticketing, GPS Tracking, Fleet Management and Courier services to the bus operators and commuters. A feature-packed Bus Ticketing Solution seamlessly manage your drivers, vehicles, bookings, payments, promotions and more. With the mentioned services we expect the bus operators will get more direct booking, increase in operational efficiencies, and manage technology services with the up-time of 95%, a seamless bus ticket booking experience to travelers and increase revenues for bus operators.

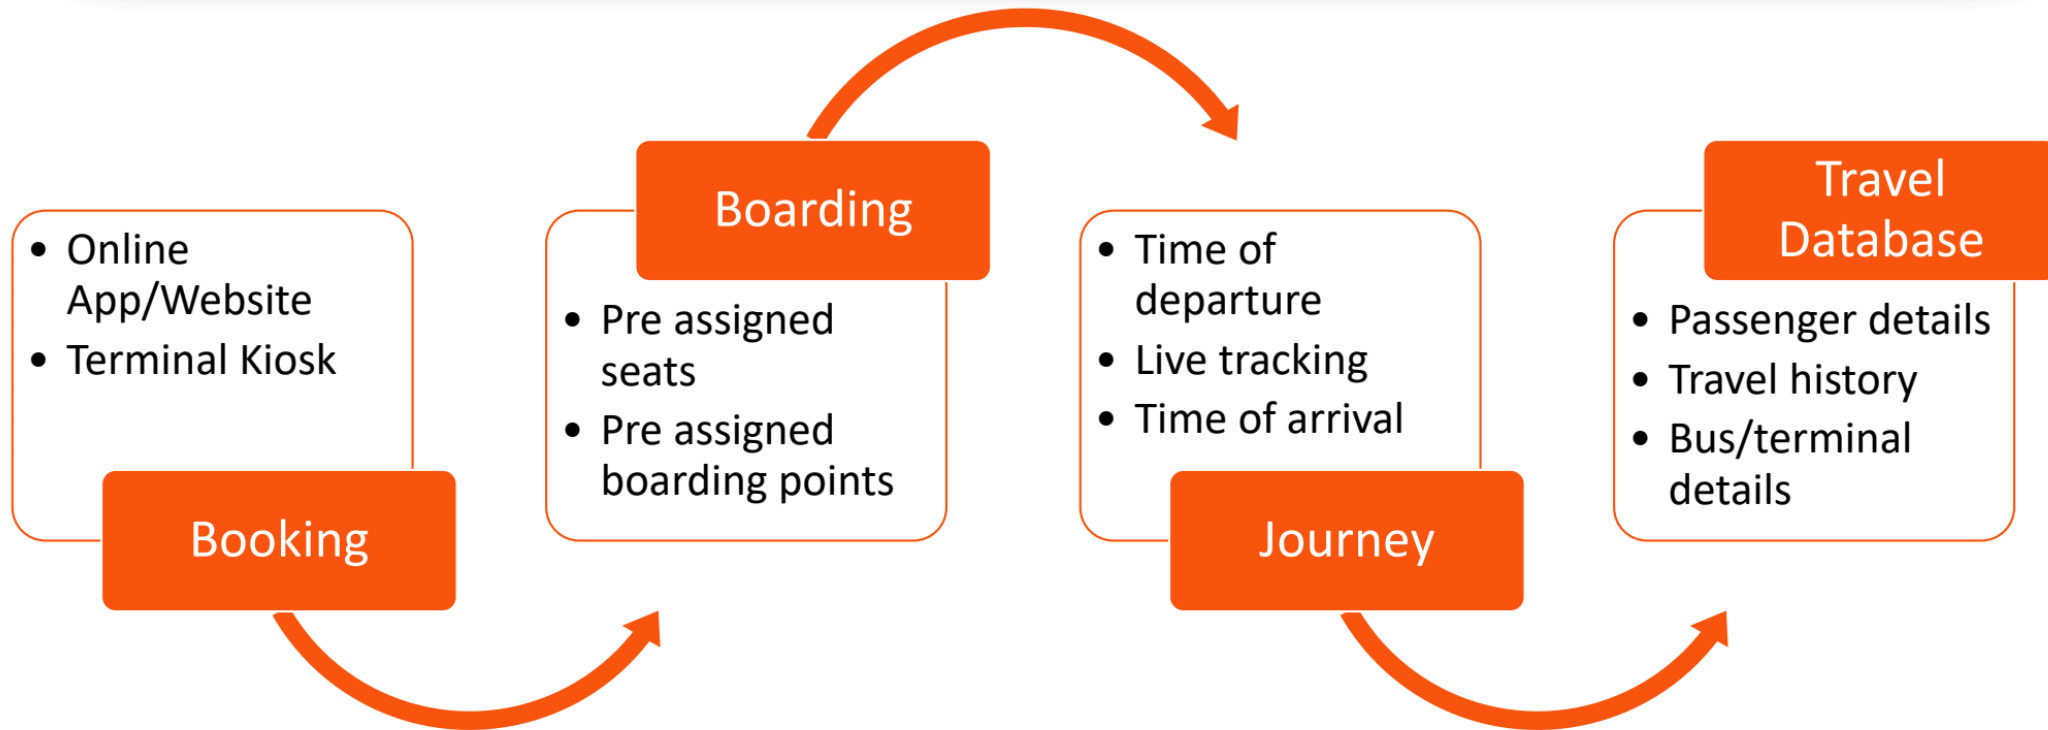

Mobile Application enables digital tracking, ticketing and payment which significantly enhances the rider experience on buses. Its technology also enables bus operators to enhance schedule adherence and optimize travel times. Fleet Management system that can perform complete planning, implementation and control of all aspects of the vehicle and driver. From monitoring of the vehicle, its fuel consumption, utilization, planning vehicle to a complete dispatch center that provides complete planning and implementation of all the lines and departures. This system allows bus operators to have full control and all information related with their fleet. Entire DOSAFAR system development is based on years of experience gained in the direct collaboration with the bus operators. Therefore DOSAFAR services meet the requirements of public transport service providers and other bus operators. The business experience of various customers - bus operators, our ticketing system covers almost every possible operating process of bus operators and bus resellers. Each software part of the system can work independently, but also can be combined with other software parts in accordance with the specific needs of each client. This makes the system customization fast and easy as puzzle folding in order to create the best solution for the end-users need.

Introduction

- 📍 The current manual method of booking intercity bus transportation tickets lacks the tools and systems required to track and trace all passengers.
- 📍 DOSAFAR digital ticket booking platform provides complete end to end technology solution to record, store and retrieve all passenger information.
- 📍 DOSAFAR public transportation solutions, increase productivity, make efficient operation process and reduced operations costs,
- 📍 Importantly passengers will start availing the service over internet via mobile and web, DOSAFAR will gives passengers reliability of their public transportation system and increase ridership by using there online service.

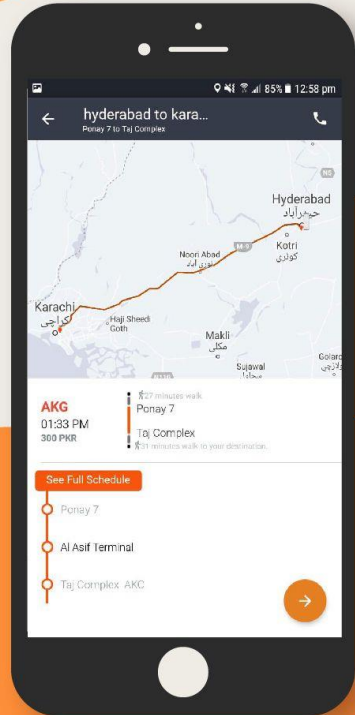

Dosafar Technology Platform

DOSAFAR is a technology platform that enables automation of the entire travel process. It offers online and connected tools for passengers, drivers, bus owners, and bus terminals which simplify the process of booking, seat and journey management, asset tracking, and asset management.

DOSAFAR is providing an online e-ticketing solution. DOSAFAR platform provides a digital network which functions as a market place where person (user) who seeks personal transportation services , e-payment services or logistic services can be competitive with persons. Each user need to create a user account that enable access to the DOSAFAR platform.

We aim to update the DOSAFAR Platform regularly and may change the aggregation at any time. If the need arises, we may drape access to the DOSAFAR Platform and the Services or close them permanently. Any of the material on the DOSAFAR Platform or the Services may be out of date at any given time, and we are under no liability to update such material.

Dosafar – The Way Forward

- 📍 Dosafar brings mass intercity travel into digital realm
- 📍 Through us, Govt. can ensure that its SOPs are implemented in letter and spirit
- 📍 By online bookings, monitoring and tracking, spread of COVID 19 can be controlled
- 📍 Livelihood of millions can be restored while ensuring a SMART management of mass movement
- 📍 Considering the above, we suggest the following;
- 📍 Identify and test a few pilot terminals with Dosafar platform
- 📍 Make the features of online/POS booking, tracking and reporting, mandatory for all intercity travel
- 📍 **TOGETHER WITH YOUR SUPPORT WE CAN FIGHT CORONA AS WELL AS BRING A DIGITAL REVOLUTION**

DOSAFAR IS LOOKING FORWARD TO WORK WITH YOU.
